

Content Outline for a Hurdy-Gurdy Website

Kade Becker

<https://en.wikipedia.org/wiki/Hurdy-gurdy>

My goal is to build a site with multiple pages and to have panels on pages where necessary. I will also build a navigation bar at the top to guide the user through the different pages.

Pages outline:

- Introduction/homepage - A home page that includes the article's introduction/overview
- History - a page dedicated to the history section
- Terminology - a page with panels dedicated to the terminology section
- Nomenclature - a page dedicated to the nomenclature section
- Design - a page dedicated to the design section with the following panels
 - Shape
 - Strings
 - Buzzing Bridge
 - Regional Types
 - Small wheel
 - Large wheel
- Electric and Electronic Versions - a page dedicated to the electronic section
